Subject Index

Canadian Journal of Soil Science, Volume 81, 2001

Acid detergent fibre
  mixed papermill residues affect grass-alfalfa sward, 103
Adsorption
  uracil adsorption on solid humic acids, 309
Adsorption site
  organic matter and rate of K adsorption, 325
Aggregate stability
  zero tillage-fertilizer effects on soil quality, 157
Aggregation, soil
  aggregation and organic matter in a Humic Gleysol, 545
Alfalfa
  mixed papermill residues affect grass-alfalfa sward, 103
Alfisol
  Ca-Mg ratios for evaluating pedogenesis, 415
Alkaline phosphatase
  aggregation and organic matter in a Humic Gleysol, 545
Ammonia volatilization
  time of application: manure ammonia losses, 525
Ammonium
  N dynamics following application of pig slurry, 515
Ammonium nitrate
  time and placement of nitrogen with winter wheat, 613
Anion exchange membranes
  soil-available phosphorus, 167
Ap horizons
  deep ripping of reconstructed Ap horizons, 113
Atomic force microscopy
  cadmium adsorption on ha:atomic force microscopy and EXAFS, 337

Barley
  CO_2 balance of a crop-fallow rotation in western Canada, 121
Bassin versant
  technologies géomatiques pour spatialiser l'érodabilité des sols, 423
Beef pasture
  soil chemical properties and nutrient redistribution in pastures, 395
Bioaugmentaiton
  carbon transformations in hydrocarbon-contaminated soils, 193
Bioavailability
  carbon transformations in hydrocarbon-contaminated soils, 193
Biodiversity, microbial
  tillage and S affect soil microbes, 577
Biolog
  tillage and S affect soil microbes, 577
Biological quality, soil
  tillage and S affect soil microbes, 577
Bioremediation
  carbon transformations in hydrocarbon-contaminated soils, 193
Biosolid
  composting organic residues, 357
Birnessite
  birnessite catalysis of Maillard reaction, 277
Bloch decay
  effective ^{13}C CPMAS NMR of soil organic matter, 255
Boreal forest
  effects of wildfire and clearcutting on soils, 229
Bulk density
  water retention of peat-amended soils, 205

Cabbage
  combined papermill sludge as nutrient source, 1
Cadmium
  cadmium adsorption on humic acid: atomic force microscopy and EXAFS, 337
  long-term cultivation impact on organic matter and cadmium in soil, 349
Calcium-Magnesium ratios
  Ca-Mg ratios for evaluating pedogenesis, 415
Carbohydrate
  aggregation and organic matter in a Humic Gleysol, 545
Carbon-13 CPMAS NMR
  long-term cultivation impact on organic matter and cadmium in soil, 349
  effective ^{13}C CPMAS NMR of soil organic matter, 255
  soil carbon changes in long-term maize cropping systems, 21
Carbon content
  changes in soil C, 221
  green manure effects on wheat nutrition, 371
  soil carbon changes in long-term maize cropping systems, 21
Carbon dioxide
  changes in soil C, 221
  CO_2 balance of a crop-fallow rotation in western Canada, 121
Carbon flow
  charred organic matter, 285
Carbon fraction
  tillage practices and soil organic carbon sequestration, 149
Carbon-13 natural abundance
  soil carbon changes in long-term maize cropping systems, 21
Carbon-13 NMR
  in situ analysis of organic matter in soils, 249
  mean residence times and characteristics of humic substances, 299
Carbon, organic
  root/straw ratios-effect of moisture and nitrogen, 39
  soil properties in an undulating landscape, 439
  tillage practices and soil organic carbon sequestration, 149
Carbon pool
  charred organic matter, 285
Carbon, root
  soil carbon changes in long-term maize cropping systems, 21
Carbon sequestration
  changes in soil C, 221
  quantifying effect of fallow frequency on soil C accumulation, 383
  scale-dependence of influence of tillage practice, 63
  spatial dependence of soil organic C mass, 53
  tillage practices and soil organic carbon sequestration, 149
  zero tillage and fertilizer effects on soil C and N, 139

Carbon, total soil
aggregation and organic matter in a Humic Gleysol, 545
Cassava
effects of fertilization of cassava on soil properties in Vietnam, 481
Century model
changes in soil C, 221
Cerrado
enzymatic and NMR studies of phosphorus in oxisols, 591
Char
charred organic matter, 285
Chemical composition
in situ analysis of organic matter in soils, 249
Chisel plowing
phosphorus fractions influenced by cropping systems, 175
Clearcutting
effects of wildfire and clearcutting on soils, 229
Composting
composting organic residues, 357
Conservation tillage
tillage and S affect soil microbes, 577
Contaminant
carbon transformations in hydrocarbon-contaminated soils, 193
Copper
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
Corn
combined papermill sludge as nutrient source, 1
Critical value
potato N fertilization and soil nitrate content, 535
Crop residues
pig slurry and straw decomposition in the field, 131
Crop rotation
history of soil science on the Canadian prairies, 489
phosphorus fractions influenced by cropping systems, 175
quantifying effect of fallow frequency on soil C accumulation, 383
zero tillage and fertilizer effects on soil C and N, 139
Cropping frequency
quantifying effect of fallow frequency on soil C accumulation, 383
Cropping system
aggregation and organic matter in a Humic Gleysol, 545
Cultivation, long-term
long-term cultivation impact on organic matter and cadmium in soil, 349
Cumulative model
models for potassium release kinetics, 603

Dairy
time of application: manure ammonia losses, 525
De-inking sludge
effect of paper sludge application to soil, 561
Denitrification
nitrous oxide production by manure, 33
Denitrifying enzyme activity
nitrous oxide production by manure, 33
Desorption
models for potassium release kinetics, 603
Dipolar dephasing
effective ^{13}C CPMAS NMR of soil organic matter, 255
Direct seeding
time and placement of nitrogen with winter wheat, 613
Discontinué spatiale
technologies géomatiques pour spatialiser l'érodabilité des sols, 423
Drainage class
spatial dependence of soil organic C mass, 53

Electrical conductivity
wood/sludge ash effects white spruce seedling growth, 85
Electro-ultrafiltration
desorption of forage available K by electro-ultrafiltration, 213
Electron spin resonance
mean residence times and characteristics of humic substances, 299
Enzyme activity
effect of paper sludge application to soil, 561
Extended X-ray absorption fine structure
cadmium adsorption on HA:atomic force microscopy and EXAFS, 337
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
Extraction
in situ analysis of organic matter in soils, 249

Facteur K d'érodabilité des sols
technologies géomatiques pour spatialiser l'érodabilité des sols, 423
Fallow
CO_2 balance of a crop-fallow rotation in western Canada, 121
Fertility
tree species effects on a Mediterranean soil, 553
Fertility groups
grouping soils of the Montreal lowlands, 71
Fertilization
effects of fertilization of cassava on soil properties in Vietnam, 481
effects of fertilizers on forest soil biota, 11
Fertilizer
zero tillage and fertilizer effects on soil C and N, 139
Fertilizer, mineral
mixed papermill residues affect grass-alfalfa sward, 103
Fertilizer N
potato N fertilization and soil nitrate content, 535
root/straw ratios-effect of moisture and nitrogen, 39
topographical response of wheat to N, 505
time and placement of nitrogen with winter wheat, 613
Fertilizer, S, type and placement
tillage and S affect soil microbes, 577
Field capacity
water retention of peat-amended soils, 205
Fire
charred organic matter, 285
effects of wildfire and clearcutting on soils, 229
Flax
quantifying effect of fallow frequency on soil C accumulation, 383
Fluxes
CO_2 balance of a crop-fallow rotation in western Canada, 121
Forage
mixed papermill residues affect grass-alfalfa sward, 103

Forest, boreal
effects of wildfire and clearcutting on soils, 229
Forest soil
tree species effects on a mediterranean soil, 553
Fourier transform infrared
mean residence times and characteristics of humic substances, 299
Fractionation
in situ analysis of organic matter in soils, 249

Géomatique
technologies géomatiques pour spatialiser l'érodabilité des sols, 423
Geostatistics
heavy metals in serpentine soils, 429
GIBSI (Gestion Intégrée des bassins versants à l'aide d'une Systèm Informatisé)
technologies géomatiques pour spatialiser l'érodabilité des sols, 423
Grain protein concentration
wheat yield variation within the landscape, 459
Grain yield
zero tillage and fertilizer effects on soil C and N, 139
Grass
mixed papermill residues affect grass-alfalfa sward, 103
Grassland soils
history of soil science on the Canadian prairies, 489
Grass-P uptake
soil-available phosphorus, 167
Grazing
soil chemical properties and nutrient redistribution in pastures, 395
Green manure
green manure effects on wheat nutrition, 371

Heavy metals
heavy metals in serpentine soils, 429
mobility of heavy metals in soils, 405
Heterogenous catalysis
birnessite catalysis of Maillard reaction, 277
History
history of soil science on the Canadian prairies, 489

HNO_3-K
desorption of forage available K by electro-ultrafiltration, 213
Humate complexes
cadmium adsorption on HA:atomic force microscopy and EXAFS, 337
Humic acid
cadmium adsorption on humic acids: atomic force microscopy and EXAFS, 337
effect of temperature on metal binding by humic acids, 331
uracil adsorption on solid humic acids, 309
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
Humic substances
mean residence times and characteristics of humic substances, 299
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
Humic substance formation
birnessite catalysis of Maillard reaction, 277
Humin
mean residence times and characteristics of humic substances, 299
Hydraulic properties
soil water drying and recharge rates, 45
Hydrocarbon
carbon transformations in hydrocarbon-contaminated soils, 193

Incremental model
models for potassium release kinetics, 603
Ion exchange
effects of fertilization of cassava on soil properties in Vietnam, 481
Isotherms
effect of temperature on metal binding by humic acids, 331
uracil adsorption on solid humic acids, 309

Kinetics
organic matter and rate of K adsorption, 325
Kinetic model
carbon transformations in hydrocarbon-contaminated soils, 193

Labile and heavy fractions of organic matter
green manure effects on wheat nutrition, 371
Labile P
enzymatic and NMR studies of phosphorus in oxisols, 591
Landscape
soil moisture and nutrient variation, 449
soil properties in an undulating landscape, 439
wheat yield variation within the landscape, 459
Legume
soil carbon changes in long-term maize cropping systems, 21
Lentil
quantifying effect of fallow frequency on soil C accumulation, 383
Light
birnessite catalysis of Maillard reaction, 277
Light fraction C and N
zero tillage-fertilizer effects on soil quality, 157
Liquid dairy manure
phosphorus fractions influenced by cropping systems, 175
Luvisol
wood/sludge ash effects white spruce seedling growth, 85
Lysimeter
wood/sludge ash effects white spruce seedling growth, 85

Maghemite
magnetic susceptibility of a soil in Quebec, 185
Maghetite
magnetic susceptibility of a soil in Quebec, 185
Magnetic susceptibility
magnetic susceptibility of a soil in Quebec, 185
Maillard reaction
birnessite catalysis of Maillard reaction, 277
Maize cropping
soil carbon changes in long-term maize cropping systems, 21
Manure
deep ripping of reconstructed Ap horizons, 113
green manure effects on wheat nutrition, 371
nitrous oxide production by manure, 33

time of application: manure ammonia losses, 525
Manure application
time of application: manure ammonia losses, 525
Manure, liquid dairy
phosphorus fractions influenced by cropping systems, 175
Manure, poultry
effect of paper sludge application to soil, 561
Mean residence times
mean residence times and characteristics of humic substances, 299
Medicago sativa L.
mixed papermill residues affect grass-alfalfa sward, 103
Mediterranean soil
tree species effects on a mediterranean soil, 553
Mehlich 3-K
desorption of forage available K by electro-ultrafiltration, 213
Mehlich 3-P
soil-available phosphorus, 167
Metal binding
effect of temperature on metal binding by humic acids, 331
uracil adsorption on solid humic acids, 309
Metal, trace
composting organic residues, 357
Microbial biodiversity
tillage and S affect soil microbes, 577
Microbial biomass
aggregation and organic matter in a Humic Gleysol, 545
effects of fertilizers on forest soil biota, 11
tree species effects on a mediterranean soil, 553
zero tillage-fertilizer effects on soil quality, 157
Microbial respiration
green manure effects on wheat nutrition, 371
Microfauna
effects of fertilizers on forest soil biota, 11
Microorganism, pathogenic
composting organic residues, 357
Mineral fertilizer
mixed papermill residues affect grass-alfalfa sward, 103
Mineralizable N
zero tillage-fertilizer effects on soil quality, 157
Mineralization coefficient
combined papermill sludge as nutrient source, 1
Mobility
mobility of heavy metals in soils, 405
Moisture
root/straw ratios-effect of moisture and nitrogen, 39
soil moisture and nutrient variation, 449
Moldboard plowing
phosphorus fractions influenced by cropping systems, 175
Montreal lowlands
grouping soils of the Montreal low lands, 71
Multivariate analysis techniques
grouping soils of the Montreal low lands, 71

N-(n-butyl) thiophosphoric triamide
ammonia loss from urea amended with NBPT at varying rates, 239
Nematode ecology
effects of fertilizers on forest soil biota, 11
Neutral detergent fibre
mixed papermill residues affect grass-alfalfa sward, 103
NH_4OAc-K
desorption of forage available K by electro-ultrafiltration, 213
Nitrate
N dynamics following application of pig slurry, 515
potato N fertilization and soil nitrate content, 535
Nitrate, soil residual
soil moisture and nutrient variation, 449
Nitrogen
combined papermill sludge as nutrient source, 1
effects of fertilization of cassava on soil properties in Vietnam, 481
wheat yield variation within the landscape, 459
Nitrogen application
potato N fertilization and soil nitrate content, 535
topographical response of wheat to N, 505
Nitrogen catch-crop
nitrogen in clover-wheat intercropping, 93
Nitrogen content
green manure effects on wheat nutrition, 371
Nitrogen credit
nitrogen in clover-wheat intercropping, 93
Nitrogen cycle
N dynamics following application of pig slurry, 515
Nitrogen dynamics
soil chemical properties and nutrient redistribution in pastures, 395
Nitrogen fertilizer
topographical response of wheat to N, 505
potato N fertilization and soil nitrate content, 535
Nitrogen fertilizer placement
time and placement of nitrogen with winter wheat, 613
Nitrogen mineralization
effects of fertilizers on forest soil biota, 11
Nitrogen recovery
green manure effects on wheat nutrition, 371
Nitrogen, total
zero tillage and fertilizer effects on soil C and N, 139
Nitrous oxide production
nitrous oxide production by manure, 33
Non-N nutritional effect
nitrogen in clover-wheat intercropping, 93
Nucleic acid constituents
uracil adsorption on solid humic acids, 309

Olsen-P
soil-available phosphorus, 167
Opaque minerals
magnetic susceptibility of a soil in Quebec, 185
Organic amendments
N dynamics following application of pig slurry, 515
pig slurry and straw decomposition in the field, 131
Organic carbon
soil properties in an undulating landscape, 439
Organic compounds
sorption of organic compounds by organic matter, 317
Organic matter
charred organic matter, 285
effective ^{13}C CPMAS NMR of soil organic matter, 255
history of soil science on Canadian prairies, 489

long-term cultivation impact on organic matter and cadmium in soil, 349
organic matter and rate of K adsorption, 325
sorption of organic compounds by organic matter, 317
Organic matter dynamics
tree species effects on a mediterranean soil, 553
Organic matter, labile and heavy fractions of
green manure effects on wheat nutrition, 371
Organic P
enzymatic and NMR studies of phosphorus in oxisols, 591
Oxisol
enzymatic and NMR studies of phosphorus in oxisols, 591

Paper biosolids
effect of paper sludge application to soil, 561
Paper mill residue
combined papermill sludge as nutrient source, 1
effect of paper sludge application to soil, 561
mixed papermill residues affect grass-alfalfa sward, 103
Partition
sorption of organic compounds by organic matter, 317
Pasture, beef
soil chemical properties and nutrient redistribution in pastures, 395
Pathogenic micro-organisms
composting organic residues, 357
Peat
deep ripping of reconstructed Ap horizons, 113
Pedogenesis
Ca-Mg ratios for evaluating pedogenesis, 415
pH
soil properties in an undulating landscape, 439
wood/sludge ash effects white spruce seedling growth, 85
Phosphorus
effects of fertilization of cassava on soil properties in Vietnam, 481
effect of paper sludge application to soil, 561
Phosohorus-31 NMR
enzymatic and NMR studies of phosphorus in oxisols, 591
Phosphorus desorption
soil-available phosphorus, 167
Phosphorus, extractable
soil moisture and nutrient variation, 449
Phosphorus fractions
phosphorus fractions influenced by cropping systems, 175
Phosphorus, organic
enzymatic and NMR studies of phosphorus in oxisols, 591
Phosphosmonoesterase
enzymatic and NMR studies of phosphorus in oxisols, 591
Photosynthesis
CO_2 balance of a crop-fallow rotation in western Canada, 121
Picea glauca
wood/sludge ash effects white spruce seedling growth, 85
Piedmont
Ca-Mg ratios for evaluating pedogenesis, 415
Plowing, chisel
phosphorus fractions influenced by cropping systems, 175
Plowing, moldboard
phosphorus fractions influenced by cropping systems, 175
Potassium
effect of paper sludge application to soil, 561
models for potassium release kinetics, 603
Potassium adsorption
organic matter and rate of K adsorption, 325
Potassium fertilizers
effects of fertilization of cassava on soil properties in Vietnam, 481
Potato
potato N fertilization and soil nitrate content, 535
Poultry manure
effect of paper sludge application to soil, 561
Precision farming
topographical response of wheat to N, 505
Protein concentration, grain
wheat yield variation within the landscape, 459
Pyrolysis-field ionization mass spectrometry
in situ analysis of organic matter in soils, 249
Pyroxenite
magnetic susceptibility of a soil in Quebec, 185

Quebec
effects of wildfire and clearcutting on soils, 229

Reclamation
deep ripping of reconstructed Ap horizons, 113
water retention of peat-amended soils, 205
Relative yield
potato N fertilization and soil nitrate content, 535
Resin
effects of fertilization of cassava on soil properties in Vietnam, 481
Respiration
CO_2 balance of a crop-fallow rotation in western Canada, 121
Respiration, microbial
green manure effects on wheat nutrition, 371
Rhizosphere
tillage and S affect soil microbes, 577
Root
root/straw ratios-effect of moisture and nitrogen, 39
Root carbon
soil carbon changes in long-term maize cropping systems, 21

Sanitization
composting organic residues, 357
Saprolite
magnetic susceptibility of a soil in Quebec, 185
Saskatchewan
topographical response of wheat to N, 505
Scaling
heavy metals in serpentine soils, 429
Seeding, conventional
time and placement of nitrogen with winter wheat, 613
Seeding, direct
time and placement of nitrogen with winter wheat, 613
Series, soil
scale-dependence of influence of tillage practice, 63
soil moisture and nutrient variation, 449
spatial dependence of soil organic C mass, 53
Serpentine
heavy metals in serpentine soils, 429

Sewage sludge
mobility of heavy metals in soils, 405
Sludge
combined papermill sludge as nutrient source, 1
effect of paper sludge application to soil, 561
wood/sludge ash effects white spruce seedling growth, 85
Slurry
pig slurry and straw decomposition in the field, 131
time of application: manure ammonia losses, 525
Soil chemistry
tree species effects on a mediterranean soil, 553
Soil series
scale-dependence of influence of tillage practice, 63
soil moisture and nutrient variation, 449
spatial dependence of soil organic C mass, 53
Soil-vegetation relationship
tree species effects on a mediterranean soil, 553
Solanum tuberosum
potato N fertilization and soil nitrate content, 535
Solid state ^{13}C NMR
in situ analysis of organic matter in soils, 249
Solum thickness
soil properties in an undulating landscape, 439
Sorption
sorption of organic compounds by organic matter, 317
Spatial variability
heavy metals in serpentine soils, 429
Speciation
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
Spinning sidebands
effective ^{13}C CPMAS NMR of soil organic matter, 255
Spruce, white
wood/sludge ash effects white spruce seedling growth, 85
Straw
root/straw ratios-effect of moisture and nitrogen, 39
Subsoiling
deep ripping of reconstructed Ap horizons, 113
Sulphur fertilizer type and placement
tillage and S affect soil microbes, 577
Surface application
ammonia loss from urea amended with NBPT at varying rates, 239
Surface horizon
deep ripping of reconstructed Ap horizons, 113
Sustainability
soil chemical properties and nutrient redistribution in pastures, 395
Sweet corn
combined papermill sludge as nutrient source, 1

Thermodynamics
effect of temperature on metal binding by humic acids, 331
Tillage
changes in soil C, 221
scale-dependence of influence of tillage practice, 63
tillage and S affect soil microbes, 577
tillage practices and soil organic carbon sequestration, 149
zero tillage and fertilizer effects on soil C and N, 139
zero tillage-fertilizer effects on soil quality, 157
Tillage, conservation
tillage and S affect soil microbes, 577
Tillage practices
tillage practices and soil organic carbon sequestration, 149
Timing
time of application: manure ammonia losses, 525
Topography
scale-dependence of influence of tillage practice, 63
spatial dependence of soil organic C mass, 53
Trace metal
composting organic residues, 357

Ultisols
Ca-Mg ratios for evaluating pedogenesis, 415
Uracil
uracil adsorption on solid humic acids, 309
Urea
time and placement of nitrogen with winter wheat, 613
Urease inhibitor
ammonia loss from urea amended with NBPT at varying rates, 239
UV-oxidation
charred organic matter, 285

Variable rate fertilizer application
topographical response of wheat to N, 505
wheat yield variation within the landscape, 459

Water depletion
soil water drying and recharge rates, 45
Water drying
soil water drying and recharge rates, 45
Water-holding capacity
soil water drying and recharge rates, 45
water retention of peat-amended soils, 205
Water recharge
soil water drying and recharge rates, 45
Wet and drying periods
soil water drying and recharge rates, 45
Wheat
quantifying effect of fallow frequency on soil C accumulation, 383
Wheat, winter
time and placement of nitrogen with winter wheat, 613
Wheat yield
wheat yield variation within the landscape, 459
Wheat yield and N uptake
green manure effects on wheat nutrition, 371
White spruce
wood/sludge ash effects white spruce seedling growth, 85
Wood/sludge ash
wood/sludge ash effects white spruce seedling growth, 85

XANES (X-ray absorption near edge structure) birnessite catalysis of Maillard reaction, 277
studies of CU(II) in soil by X-ray absorption spectroscopy, 271
